5. WIFI module configuration steps

There are 2 connection methods for WIFI module configuration: ① intelligent distribution network connection, ② manual AP distribution network connection

5.1. Method 1: Intelligent Network Distribution Mode

5.1.1. Open the "Smart Life" APP, log in and enter the home page.

5.1.2. Click "+" in the upper right corner or "Add Device" on the interface to enter the device type selection.

5.1.3. Select "Smart Heat Pump (Bluetooth+ Wi-Fi)" in the "Large Home Appliances" device to enter the interface for adding devices.

5.1.4. set controller

In the bright screen state, click the " button to enter the function selection page.

Click "Wifi Distribution" to enter the WIFI operation interface. Click "Intelligent Distribution Network" to enter the distribution mode.

5.1.5. After the "?" icon on the wire controller is in the flashing state, click

"Confirm the indicator is blinking" in APP. Select "Blink quickly" on the status of the indicator light or when you hear the prompt sound interface. (as shown in the figure below)

Enter the WIFI selection interface, select WIFI according to the requirements, click Next, and the page will automatically jump to the interface to start connecting the device, find the device \rightarrow register to the cloud \rightarrow device initialization done.

Click "Done" to enter the main interface of device operation directly. (The device

name can be changed in this interface 4

5.1.6. When the machine is connected to WIFI successfully, " always on.

5.2. Method 2: Manual AP distribution network mode

5.1.1. Open the "Smart Life" APP, log in and enter the home page.

5.1.2. Click "+" in the upper right corner or "Add Device" on the interface to enter the device type selection.

5.1.3. Select "Smart Heat Pump (Bluetooth+ Wi-Fi)" in the "Large Home Appliances" device to enter the interface for adding devices.

5.1.4. set controller

In the bright screen state, click the "O" button to enter the function selection page.

Click "Wifi Distribution" to enter the WIFI operation interface.

Click "Ap Distribution Network" to enter the distribution mode.

5.1.5. After the "?" icon on the wire controller is in slow flashing state, click

"**Confirm the indicator is blinking**" in APP. Select "**Blink slowing**" on the status of the indicator light or when you hear the prompt sound interface. (as shown in the figure below).

Enter the WiFi selection interface, select WiFi according to the requirements and click Next.

Connect the WiFi of the mobile phone to the hotspot of the device (as shown in the figure below), click to connect on the APP page, the page will automatically jump to the mobile phone setting page, and open the wireless LAN selection interface.

Connect to the Smart Life-XXX network, as shown in the figure: Smart Life-XXX, after the connection is successful, return to the "Smart Life" APP, and the APP will automatically enter the device connection state, find the device \rightarrow register to the cloud \rightarrow device initialization finished.

Click "Done" to enter the main interface of device operation directly. (The

device name can be changed in this interface <
